## About manufacturer

Kovinoplastika Lož from Slovenia is one of the largest and most successful European suppliers of kitchen sinks and related equipment, which boasts a 62-year tradition. It is an international company, which has earned its enviable position in the kitchen equipment market by pursuing the highest quality standards, keeping pace with modern design trends, and being a flexible and reliable business partner.

Due to its products, which boast not only outstanding quality but also an excellent quality/price ratio, Kovinoplastika Lož is quickly and effectively strengthening its market positions in Slovenia as well as in other European countries.

The Alveus brand sinks are available in many markets seven of which are controlled successfully by Kovinoplastika Lož through its subsidiaries and the rest through long-term successful partnerships with local companies.

Apart from manufacturing and marketing the Alveus brand products, Kovinoplastika Lož successfully manages the production programmes of other own brands, among which the building hardware and joinery brands stand out.

Gastronorm programme is designed for use in the catering and hotel industries and in canteens. Kovinoplastika Lož has a long tradition in cooperating with europeans most important companies in field of components.

As Kovinoplastika Lož is one of the most important centres of manufacturing knowledge in the region, the company also boasts a long tradition of successful tool manufacturing service marketing and sophisticated tool and machine manufacture and marketing.

The Alveus brand products are designed for modern high-end kitchens. In today's interiors, the boundaries between the kitchen and living area are becoming blurred, while minimalist, refined and sophisticated design solutions have begun to gain ground.

With their large, clean surfaces and innovative approach to space use, Alveus sinks perfectly match the latest furniture and architectural ideas. They are made for kitchens just like that, as their outstanding design and functional qualities exceed the existing standards in many ways.

# ALVEUS

# Great advantages

Alveus sinks rank among the most durable sinks in the market since they are manufactured from 18/10 stainless steel up to 1 mm in thickness. The main advantage of thicker steel are greater impact resistance, increased stability of a sink tap and significantly reduced level of water splashing noise. In weight comparison, sinks made of thicker stainless steel are heavier.

Granite composite sinks are composed of granite parts tightly bound with high quality acrylic resin, which helps to acquire excellent mechanical properties and chemical persistence. Some Alveus finished goods are made of tempered glass, a type of safety glass with significantly increased toughness and thermal resistance.

## Sturdiness

## Handiness

Alveus sink bowls can be deeper than other products of the sort. The capacity of the sink is thus increased by up to a few litres, which makes the task of washing up large pieces and big amounts of dishes much more comfortable.

The sinks use 1 1/2" or 3 1/2" drain plumbing (depending on the model), which allows quick drainage of large amounts of water.

Modern kitchens are flexible, well designed, and increasingly freed from the traditional division into the cooking, work and wash-up areas. With state-of-the-art sinks, the Alveus brand promotes innovative and functional kitchen solutions, which transcend the limits of the "wet" kitchen area. Alveus sinks are thus becoming an important part of everyday life, and are designed and manufactured accordingly, displaying the four most significant qualities that place Alveus sinks among the top products in the market.

Alveus sinks are surface treated to resist the growth of mould, microorganisms and bacteria. All surfaces are easy to clean, as the sinks have no inaccessible spots for bits of food and other grime to accumulate.

In addition, Alveus sinks are environmentally friendly, containing no harmful admixtures that might be released into the environment upon decomposition.

## Health and Environment Friendliness

Alveus sinks are easy to clean and maintain, as they are manufactured from top-quality materials and designed to allow simple maintenance without aggressive cleaning agents.

The composite as well as stainless sinks are extremely resistant to impacts, high temperatures, scratching, chemicals and all sorts of stains.

## Durability

# Installation Types

Alveus sinks are suitable for various installation types, thus adjusting completely to design and architectural requirements of your kitchen.

**Inset sinks** are installed into kitchen worktop, thus forming part of continuous working surface. Sink is inserted from above into a suitable worktop cut-out and fastened with supplied clamps.

**Flush mount sinks** are installed into previously adjusted kitchen worktop made of waterproof material (natural stone, composite material, glass, impregnated solid wood). Surface of the sink and surface of the worktop are in the same level. The main advantage is seamless working surface that enables very easy cleaning and an attractive appearance.

**Flat mount sink** are installed into kitchen worktop so that a uniform working surface is created. Thin, almost unnoticeable rims allow quick and easy cleaning. An additional advantage is simple installation from above into each type of kitchen worktop.

**Undermount sinks** are installed into kitchen worktop from below. Worktop must be made of waterproof material, such as natural stone and composite material. This type of installation enables various combinations of undermount bowls in different sizes. Absence of seams between sink and worktop contributes to simple hygiene maintenance and overall appeal of a kitchen.

## Premium Stainless Steel

The main characteristics and advantages of 18/10 stainless steel are:

- Easy cleaning which ensures a high level of hygiene
- Resistance to high temperatures and rapid temperature changes (thermal shock)
- Resistance to impacts
- Resistance to chemical influences
- 100 % recyclability

The stainless steel (CrNi) thickness ranges from 0.5 mm to 1.0 mm depending on the price range of the sink.

### Surface finishes

The difference between the finishes is mainly reflected in the appearance and partly in the scratch resistance. While the SAT finish produces a polished, easy-to-clean stainless steel surface the LEI finish produce a matte texture, which is less sensitive to tiny scratches, but requires a bit more care. The technical characteristics of the basic material are the same in all varieties; however, certain sinks are not always available in all three finishes.

### Special surface treatment of stainless steel

A thin vaporised metal substance known as ceramic nitride is deposited onto stainless steel surface, resulting in:

- unique metal lustre
- superior scratch resistance
- extremely hard-wearing protective surface

The surface-treated stainless steel is available in four precious metal colour shades - GOLD, COPPER, BRONZE and ANTHRACITE. Due to the nature of surface treatment process, each sink ends up with unique colour shade.

## Tempered glass

Tempered glass is a safety glass with emphasis on toughness and thermal shock resistance.

There are two available colours- black and white, which will bring uncompromising elegance and style into every kitchen.

Glass drainer surface can also be ordered in your own RAL colour shade or with personalized graphics of your choice.

## Composite material

Granital composite material is a mixture of 75-80% granite particles bound together by high-quality binder, which provides strength and flexibility to a kitchen sink as well as the resistance to temperature shocks.

Careful surface treatment makes kitchen sink smooth and pleasant to the touch. The smoothness of the surface provides an easy cleaning of the kitchen sink. Increased material sturdiness and cleaning in accordance with the instructions guarantee a long service life to these sinks.

## Top-Quality Materials

Alveus kitchen sinks are available in several materials, surface finishes and colours. Apart from the stainless steel sinks in two finishes (SAT- Satin and LEI - Leinen) and with special surface coating, our offer includes selected models from high-quality composite material and tempered glass in different colours. You will certainly find the one that will blend into your kitchen or create with the kitchen a beautiful contrast.

Stylux

## Stylux

The kitchen has grown into focal point of modern interiors, becoming the heart of family life and a place where the most important family ties are woven. ALVEUS will warm your heart with STYLUX, the family of kitchen sinks, which belongs to the very top of contemporary design solutions. You can choose amongst seven fabolous sink models of different dimensions that are built from CrNi 18/10 grade stainless steel in 1 mm thickness, and enhanced by a wide range of innovative and stylish accessories. Let the family ties be woven with ALVEUS...

Pure

## Pure

Kitchen sinks Pure will surely be a focal point of your kitchen. Your eyes will admire the sophisticated design, clean lines and impeccable shine of gorgeous Pure sinks. Enormous bowls will make you want to clean the dishes over and over. Radius 15 gives a Pure sink an elegant design and yet it makes a sink easy to clean. As the design itself is not enough, we upgraded an elegance of the sink with a F and S installation which makes a sink become one with the worktop.

Depending on your cooking skills you can choose between six spacious models.

Quadrix

## Quadrix

The Quadrix sinks allow great creative freedom in the kitchen. With clean shapes and a touch of the latest trends, they are designed for the most demanding users. The line comprises different models of various dimensions, which can be combined in any way you choose. The sinks are manufactured from high-quality stainless steel of above-average thickness. Their basic characteristic are small radii (10 mm); in combination with a 200 mm bowl depth, these provide a significantly increased sink bowl capacity.

Quadrix sinks are available in the flash and flat mount varieties.

## Monarch Collection

## Monarch Collection

Every kitchen deserves a wonderful sink. The Alveus brand of sinks has had a new addition to its product range – the Monarch Collection. These sinks come in four stunning colour shades – GOLD, COPPER , BRONZE and ANTHRACITE. These precious stainless steel colours will add unique sparkle to your kitchen. The metal lustre of Monarch Collection sinks will add a touch of mystique to your kitchen.

Due to special surface treatment technology each sink ends up with unique colour shade. The attractiveness and functionality are supplemented by the accessories such as wooden or glass chopping board and stainless steel strainer bowl in the sink colour. Sinks from the Monarch Collection can be complemented by the taps Alveus from Monarch or standard (chrome plated) product range.

Tempered Glass

## Tempered Glass

Kitchen sinks made of tempered glass will bring creative elegance and colour into your home. The sinks are made for most demanding users, who require not only uncompromising quality, but also cutting edge design and who dare to try something different. The sinks are available in four amazing designs (Crystalix, Karat, Wave and Glassix) in different models and colours. They are manufactured from premium stainless steel and equipped with glass top made of tempered safety glass. Tempered safety glass improves the mechanical properties of the glass by greatly increasing its toughness.
